Teslin

Adhesive / Non-Adhesive / Waterproof / Tear-Resistant

A high-performance synthetic paper for durable applications

TESLIN® is a durable, secure and highly printable synthetic paper that excels for laminated print projects and other applications demanding a tough, high-performance material. As a single-layer, polyolefin-based material, Teslin substrate is in a category of its own among synthetic papers and printable plastics because it is engineered with a microporous matrix that allows it to absorb and create strong interlocking bonds with inks, adhesives, coatings and laminating films.

Specifications

- ▶ Tear resistant
- ▶ Waterproof

Press

- ▶ Digital

Finishing

- ▶ Folded
- ▶ Die-cut
- ▶ Punched
- ▶ Embossed
- ▶ Foil stamped
- ▶ Stapled
- ▶ Riveted

Applications

- ▶ Maps and guides
- ▶ Technical manuals
- ▶ Durable brochures
- ▶ Menus
- ▶ Book covers
- ▶ ID & gift cards
